

Doxe Update Instructions

Important Before applying the update **v 2.1** make sure you are using **v 2.0** (You can check the current version to login your admin panel > footer), If you are using an older version please contact our support codericks.envato@gmail.com to get all the previous versions.

Step 1: Download the latest script from codecanyon and extract it on your pc. Open **updates > v2.1 > uploads** folder there you will see **2 zip files** in this folder and you need to upload those files in your server please follow the below directions carefully.

- **application.zip** > upload path: Goto your project **root folder** > **application** upload this zip file inside this folder and extract.
- **assets.zip** > upload path: Goto your project **root folder** upload this zip file on there and extract.

Step 2: Upload “**updates**” folder in your project root folder

Step 3: Open a browser and write a url like this: www.yourdomain.com/updates/v2.1 you will see a page like below here enter your item purchase code for update this script.

The screenshot shows a web interface for a two-step update process. At the top, a progress bar has two steps: 'Start' (indicated by a blue circle with a right arrow) and 'Database' (indicated by a grey circle with a database icon). The 'Purchase Code' section contains a text input field with the placeholder 'Enter Purchase Code' and a blue 'Continue →' button. Below this, a small text block says 'If you don't know how to get item purchase code on envato please click the below button' with a blue button labeled 'Find my Code'.

Step 4: Here provide your current database credentials and wait a few seconds to update your scripts.

The screenshot shows the 'Database' step of the update process. The progress bar at the top now has 'Start' as a grey circle and 'Database' as a blue circle with a database icon. The 'Database' section contains four text input fields: 'Host' (with 'localhost' entered), 'Database Name' (with 'Database Name' entered), 'Username' (with 'Username' entered), and 'Password' (with 'Password' entered). At the bottom, there are two blue buttons: 'Prev' and 'Finish'.

Note: After applying the update, clear your browser cache and check the update.

If you have multiple language then this is for you:

In this update we have added few new language values so after applying the updates you need to go the **admin panel > language > admin values** and translate new values on there
